

IMAGE KEYWORD TAXONOMY

Here's my current taxonomy of keywords used to tag my photos. I've noted where I've deleted some of the sections bought from outside sources since they might have a problem with me posting it. Items {in brackets} are synonyms to their parent items. This is an evolving list, and I add keywords as I need them but don't often finish out an entire category with all possible options, so there are normally many holes. So please let me know what I'm missing.

Thanks!
